

CHINA COLD SNAP WARNING UPDATE

From **December 13th to 16th**, a strong cold snap will start from Xinjiang and affect China from west to east and from north to south. Most areas will experience **4-6 level northerly winds**, while the **eastern and southern sea areas** will have **6-8 level winds** with **gusts up to 9-10 levels**.

The **north and east ports** of China will be affected from **14th/Dec** so please be aware for possible **widespread closures** from that date onwards.
